Federal Communications Commission,  
I believe everyone has the right to report traffic and weather conditions whether it be Satellite Radio or Broadcasters. Neither one of these groups have an exclusive right to report traffic and weather conditions. I am asking you to reject the NAB's petition 04-160 because it would give exclusive rights to one party and not the other.

I have a subscription to Satellite Radio simply because it offers a better selection of entertainment without all of the commercials.
